Cost Estimate

Dear Andy,

As we discussed in the phone conversation on March 13, 2019, I will provide the following services concerning the noise issues associated with the East Greenwich waterfront. These services include the following:

- 1) Site visit to the East Greenwich waterfront (1 hour + 1 hour of travel to and from the site)
- 2) Development of a measurement and data analysis plan. (1 hour)
- 3) Measurements and analysis of the received levels in the East Greenwich waterfront activities using an advanced sound level meter. (3 hours + 1 hour of travel to and from the site)
- 4) Estimate the effects of distance, nearby topography and structures on the sound levels at residences based on accepted acoustic modeling paradigms, past experience and engineering judgment. (3 hours)
- 5) Preparation of a report documenting the results of this study and recommendations for possible sound mitigation measures. (4 hours)
- 6) Attendance and testimony at various Town Council, Zoning Board and other meetings and hearings. (2 hours + 1 hour of travel per meeting, initially estimating 2 meetings)
- 7) Any additional testimony, analysis or measurements you request. (as needed)

Based on the above, I estimate a total of 20 hours (4 of which are travel). My hourly rates are \$250 for site visits, measurements, analysis, report writing, and testimony and \$125 for travel. There is also a \$150 equipment charge. The total cost estimate is \$4650. I bill for the hours I spend on the project at the end of each month, and request payment by the 15<sup>th</sup> of the next month. Attached is my CV as requested.
